

## Registered Certified Backflow Device Testers

All backflow prevention assemblies must be tested by a plumbing or mechanical contractor who is certified by the State Plumbing Board and who has had their test gauge(s) certified within the current calendar year. **The City of Grandville requires that all device test results be submitted online by the contractor performing the testing as email, mail, or fax submissions are no longer accepted.**

Below is a current list of companies that have met city requirements and are registered to test and electronically submit test data for devices in the City of Grandville. This list is provided as a courtesy and is not intended as an endorsement; the businesses listed below have no affiliation with the City of Grandville. It is the responsibility of the facility owner/homeowner to hire a contractor and pay for any services rendered. It is recommended to call more than one contractor for price quotes and comparisons before making a selection.
